WE ESPECIALLY INVITE CHARGE ACCOUNTS

A charge account is more convenient than to remit for each order at the time it is sent us; you pay no more for your goods by reason of this accommodation. As to our responsibility, we refer you to Dun's or Bradstreet's Mercantile Agency or any bank or trust company.

When sending your first charge order, refer preferably to someone in either your own or our line of business with whom you have a charge account. This frequently saves delay.

SPECIAL NOTICE.—We pay postage charges on all orders for Vegetable and Flower Seeds provided the order calls for packets, ounces, quarter pounds or pounds (beans, corn, peas and grass seeds, bulbs, plants and sundries are not included). IMPORTANT NOTICE.—All shipments of plants, perishable stock and cold storage bulbs are made at buyers' risk only.

If such shipments arrive in bad condition, accept them and receipt for them accordingly, and make claim for your loss on the transportation company. We, of course, will hold ourselves ready to assist you in any possible way. It has been found that claims can be collected more readily by the person receiving the goods than by the shipper.

Our custom to guarantee the actual arrival of goods (except at points where there is no freight or express agent), will still be continued, and claims for loss or non-arrival of merchandise not perishable will, as in the past, be cared for by us, so you run no risk of having to make claims for lost goods.

MICHELL'S SUPERB ASTERS

We wish to emphasize the fact that our Asters are grown for us by specialists, and nearly all varieties under our own supervision. Michell's "Distinctive" Quality is nowhere more prominent than with our Asters, and we can recommend them with the utmost confidence to produce the very best results. Our seed is grown from plants which are free from disease.

SPECIAL NOTE.—In growing Asters, old soil and flats should never be used the second time without thoroughly sterilizing, to avoid the numerous diseases to which Asters are so susceptible; barnyard manure should never be employed as a fertilizer; we recommend the use of finely ground bone meal. Asters should

MICHELL'S VEGETABLE SEED SPECIALTIES

FOR MARKET GARDENERS

In line with our usual custom, we have taken from our general list certain specially meritorious varieties of vegetable seeds, to which we call, on this and the two succeeding pages, special attention. Planters will do well to include these sorts in their seed order.

Beet, Detroit Dark Red (Special Strain)

BEET, DETROIT DARK RED

(Michell's Special Strain)

A selected strain grown for us by a very careful grower. An early, globe-shaped variety; good size, smooth and handsome and of a dark blood red color; the flesh is deep vermilion red, zoned with a lighter shade of the same color; of excellent quality, and a desirable sort for canning. Suitable for fall use as well as for spring. 20c. per oz.; ¼ lb., 60c.; \$2.00 per lb.; 5 lbs., \$9.75; \$19.00 per 10 lbs.

Celery, Easy Blanching (Penna. Grown Stock)

CELERY, "Easy Blanching" PRIVATE STOCK, PENNA. GROWN

The best for Market Gardeners

This is a very much improved type of Easy Blanching Celery, being superior in every way. The flavor is delicious; the stalk very large and fine grained; the color all that can be desired. Plants set out in June are fully matured and ready for market in the early part of September, making it a most profitable sort for the market gardener; large, full heart with plenty of edible outside stalks. Unquestionably this is the best celery in the market. Our stock is carefully selected for type and quality. Per ½ oz., 50c.; 90c. per oz.; ¼ lb., \$3.25; \$12.00 per lb.

NOTE-All seeds offered on this page mailed postpaid at prices quoted.

See page 31 for complete list of table beets

Early Green Calabrese Broccoli

BROCCOLI, EARLY GREEN **CALABRESE**

This is the variety so much sought by the Italian trade and has become quite popular in our American gardens; forms a fair size green head; after this is cut from the main stalk, new sprouts develop which form small heads of a loose nature and when cut and marketed brings a handsome price. For an early crop, sow seed in cold frames, transplanting at the proper time; ready in about 4 weeks from sowing of seed; prepare this delicious vegetable same as cauliflower. \$1.00 per oz.; $\frac{1}{4}$ lb., \$3.50; \$13.00 per lb.

FINOCCHIO OR FLORENCE FENNEL

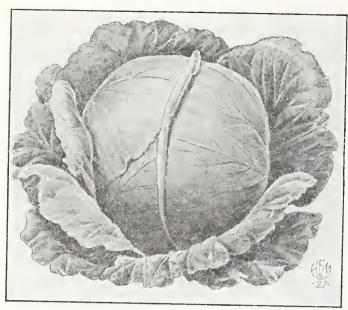

A delicious Italian vegetable which tastes quite like Celery, but is a little sweeter and more delicate in flavor. The enlarged leaf bases are usually boiled in preparation for the table. 15c. per oz.; 1/4 lb., 45c.; \$1.50 per lb.

Finocchio or Florence Fenne

MICHELL'S VEGETABLE SEED SPECIALTIES

FOR MARKET GARDENERS

Golden Acre Cabbage

CABBAGE, GOLDEN ACRE

A new acquisition to the cabbage family; plants of dwarf habit; heads, medium size, averaging 5 lbs. in weight; round, solid and with but few outer leaves, therefore suitable for close planting. Follows the Baby Head in earliness, yet 10 days earlier than Copenhagen Market. 65c. per oz.; ¼ lb., \$2.25; \$8.00 per lb., postpaid.

EARLIEST OF ALL TABLE CORN

There is big money in growing early corn; this is a profitable sort. It can be planted before any other variety, as it stands considerable cold. Although not quite as sweet as some other varieties, yet it makes a delicious table corn. Produces a nice sized ear for such an early variety, measuring from 7 to 8 inches in length. The demand by the Philadelphia and New York markets has far exceeded the supply. 30c. per lb. (by parcel post, 40c.); 55c. per 2 lbs. (by parcel post, 70c.); 5 lbs., \$1.25 (by parcel post, \$1.45); \$2.30 per 10 lbs. (by parcel post, \$2.60); 25 lbs., \$5.50; \$21.00 per 100 lbs.

DANDELION

THICK LEAVED OR CABBAGING

While this name applies to one of the most obnoxious of weeds, this variety is a valuable vegetable, prized as the first spring greens. The leaves which are very fleshy, are boiled and served hot or cold; not alone is it appetizing, but very healthy and highly recommended by physicians. Seed should be sown in spring thickly in the garden, where the plants should remain for the season; late in the fall cover the bed with a movable sash, or leaves, or salt hay for protection. To be real tender it must be used very early in the spring, after which the bed should be destroyed. 85c. per oz.; ½ lb., \$3.10; \$12.00 per lb., postpaid.

EGG PLANT FLORIDA HIGH BUSH

The plants of this variety stand very erect, bearing nice sized purple fruits well off the ground. Will bear a much larger crop during adverse weather conditions than other varieties. 50c. per oz.; $\frac{1}{4}$ lb., \$1.60; \$6.00 per lb., postpaid.

GOLDEN SUNSHINE SUGAR CORN

Especially desirable for its extreme earliness, maturing a week or ten days before Golden Bantam; dwarfer in habit; ears $6\frac{1}{2}$ inches long, and containing 12 rows of broad, yellow sweet grains. 35c. per lb. (by parcel post, 45c.); 2 lbs., 65c. (by parcel post, 80c.); \$1.50 per 5 lbs. (by parcel post, \$1.70); 10 lbs., \$2.80 (by parcel post, \$3.10); \$6.50 per 25 lbs.; 100 lbs., \$24.00.

LETTUCE GRAND RAPIDS

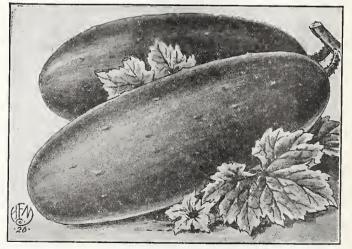

The leading variety in this class for forcing under glass, but it may also be grown successfully outdoors. The leaves are very curly, crisp and brittle, and have a palatable flavor. We pay particular attention to the seed stock, therefore offer a strain of especial merit. 20c. per oz.; ¼ lb., 55c.; \$1.75 per lb., postpaid.

SEMESAN

is a convenient dust or liquid method of disinfecting truck crop seeds. See page 99.

Golden Sunshine Sugar Corn

Cucumber, Early Market

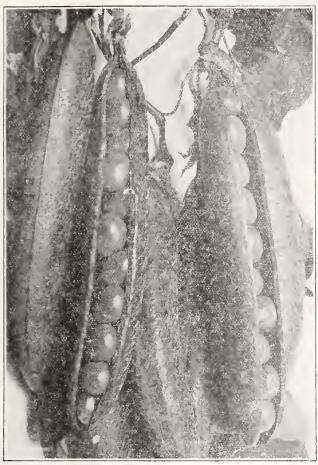

EARLY MARKET CUCUMBER

Retains its dark green color.

This is without a doubt one of the best cukes for those who plant for profit; early, uniform in shape and size and averaging 8 inches long; dark green in color. If you want a real fancy cucumber, that will bring top prices, plant this one. 20c. per oz.; ½ lb., 60c.; \$2.00 per lb., postpaid.

MICHELL'S VEGETABLE SEED SPECIALTIES

We pay particular attention to the seed stock, therefore offer a strain of especial merit. 20c. per oz.; ¼ lb., 55c.; \$1.75 per lb.

Silesian. This variety should be cut instead of pulled, as it makes new growth from the same root. A light green color, and when given plenty of room will form a large loose head. 20c. per oz.; ¼ lb., 45c.; \$1.50 per lb.

COS, ROMAINE, OR CELERY LETTUCE

Of French origin, this type differs greatly from the American varieties by its peculiar upright growth. To have it tender the heads must be tied together at the top so that the inner leaves blanch. It is best adapted to outdoor planting and stands the heat well. The Romaine lettuces sell readily to most all trade and should be grown more generally by market gardeners.

Kingsholm Cos. The largest and best heading variety of this type. The inner leaves blanch almost pure white and have little or no rib; the heads are very full throughout and therefore contain more edible part. 20c. per oz.; ¼ lb., 55c.; \$1.75 per lb.

The sterile spawn is dried thoroughly and each piece wrapped in tissue paper and contains full instructions. The plants, we send out, must measure up to a high standard. We are constantly experimenting with new varieties and discarding others. The following list represents only field grown hardy plants of worthy varieties.

Last Summer and Autumn Perennials produced flowers, where all other cut flowers were hardly obtainable, and they brought top notch prices. Others are making a big profit by growing Perennials—so can you.

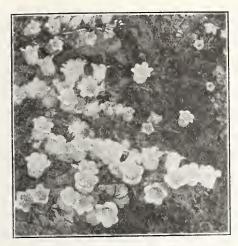

Varieties marked * are especially suitable for cutting, while varieties marked (R) are indispensable for rockeries.

"EDITH NORTH"

(Cross Between Lucy Becker and Wurtembergia)

Disseminated by Henry F. Michell Company

À

A most valuable addition to this race of Pot Plants.

It has a wonderful habit, holding its fine trusses of flowers well above the foliage.

The color is rose-pink, shaded deeper pink in upper petals, blotched dark brown.

The plants, when in bloom, are similar in appearance to a well grown Azalea indica, Mme. v. der Cruyssen.

į.

It is well branched, producing 15 to 20 branches, each branch furnishing 4 to 5 flower heads. Each flower head has six to nine florets, each floret measuring about 2 inches.

Foliage is of heavy leathery texture and practically free from white fly.

Unsurpassed for Easter, Mother's and Memorial Days.

Suggestions in Connection with the Growing of Hardy Lilles Under Glass

Hardy lilies should be grown cool and given 16 to 18 weeks from time of planting to bring them into bloom, so the best results can be obtained. In fact if you can give them longer to come into flower it is better. Where they are forced with plenty of heat, the result is that you get good foliage with not so many blooms early. We have particular reference to Lilium Magnificum, Melpomene, Rubrum and Album.

LILY OF THE VALLEY

Bundles or Clumps (for Outdoor Use Only)
These are excellent for landscape work. Bundles contain 15 good size pips with good root growth, all of which will flower

good size pips with good root growth, all of which will flower with the proper care; they are especially imported from abroad, the best of the crop being selected for us, carefully packed and can be stored in a cold cellar. These pips should not be compared with native grown stock which usually throw an average of 2 to 3 flowers to the clump; pips are washed clean and packed in peat moss thus making transportation light. We can make shipment of these as late as May 1st. Why not try a few for your trade? The Japanese Beetle quarantine does not affect the shipment of this stock. 50c. per bdl.; doz. bdls., \$5.00; \$40.00 per 100 bdls.
